## **Suitcase 10 and Auto-Activation of Fonts**

**Created**  
2/19/2002

### **Suitcase 10 and Mac OS 9**

Suitcase 10 supports auto-activation of fonts for Creator 6 running on Mac OS 9.

**Product**  
Creator 6

### **Suitcase 10 and Mac OS X**

**Platforms**  
Mac OS 9,  
Mac OS X

Suitcase 10 supports auto-activation of fonts in Mac OS X for applications running in the classic environment only. Some applications support this feature automatically, while others support it through a plug-in supplied with Suitcase. Creator 6 cannot use this feature, because Creator 6 is disabled in the Mac OS X classic environment.

Suitcase 10 does not currently support auto-activation of fonts in native Mac OS X applications, such as Creator 6.
