Title

Problems Installing Creator 6

Created
12/18/2001

Modified
12/18/2001

Issue

You are unable to install Creator 6 from the CD. It begins to install and immediately quits with a Type 3 error message.

Product
Creator 6

Platforms
Mac OS 9,
Mac OS X

Solution

1. Double-click the installer CD.
2. Drag the contents of the CD to the desktop.
3. Restart the computer with Extensions turned off (Hold down the Shift key while restarting).
4. Once the computer restarts, open the installation folder and install normally.
5. Restart the computer.
6. Launch the application and serialize.
